RESILIENCE: PERFORMANCE DURING THE PANDEMIC!

Despite the lull in the global financial markets due to the Covid-19 pandemic lockdowns across many countries, Nigeria included, we at NLPC were able to navigate our way to a stellar performance in 2020.

Independent analysts noted that we maintained a dominance in the industry by return on contribution for Funds II, III & IV, but average for Fund I. Our ROI in these Funds (II – IV) were considerably greater than the prevailing inflation rate as highlighted in the table below.

One should note that past performance is not a guarantee of returns in the future, especially since there are factors beyond our control as investment managers. While we can exercise control of asset allocations, or forecast the direction of the market and set our level for risk tolerance, it is government policies that have the greatest impact on the financial environment.

We do not have any control of government policies. Be it Monetary or Fiscal policy, either can work for or against us affecting the markets and directly impact unit prices.

We rely on our expertise, experience and capability to deliver great results so that you can benefit from great returns and retire happy.

MEMORABLE QUOTE

"To enjoy a long comfortable retirement, save more today". Do not save or invest what is left after spending, but spend what is left after saving or investing"

Warren Buffet

THE KNOWLEDGE SECTION - "CLOSING INVESTMENT VALUE" (CIV).....

In short, CIV = Net Contributions + Returns on Contributions (ROI) or Accumulated Units x Current Unit Price. Additional remittances lead to increases in net contributions and accumulated units. CIV and Unit Price are subject to fluctuations as a result of market forces. Your alerts are indicative of the true position of your investments.

We remain one of the best and most competitive for ROI.

We Are At Your Service!
